

## Remote Client Installation in Windows Vista

- Insert the Remote Client CD and wait for the explorer window to open automatically.
- Find the **Setup.exe** file and **Right-click** on it.
- Click on "**Run as Administrator**".
- Follow the on-screen instructions to install the software normally.

### **NOTE: DO NOT OPEN THE CLIENT APPLICATION.**

- **Right-click** on the **Cyberview Client** shortcut on the desktop.
- Click on "**Run as Administrator**".
- Create a Site, IP Address, User ID, and Password.
- Click on Insert.
- Then click on Connect.
- Once connected click OK to test the live playback.
- Click on the connection button and then click Disconnect.
- Click on Cancel, and then Power to exit the Client.
- From now on the client can be launched normally by double-clicking the icon.
